

Milestone #3, Progress Report, (Due date - 7th week) 30 points

Progress Report

In this milestone, you will start writing some Python code to be used later in milestone #4. You can find the sample code at [this link](#). The easiness of this milestone gives you a chance to start working at milestone #4, therefore in the meanwhile finish some parts of it as well. Helpful library Installation on [Mac](#), and [VM](#).

What to turn in?

For this milestone, submit a short report (1-3 pages) PDF file showing that you made progress with writing some basic python code and if you have started working on milestone #4, and can use the necessary libraries. Your report must include proof of the following items:

- Code writing practice: You can use Python and import the libraries in your code. Please include a screenshot of your written code so far.
- Any changes you made from the previous milestones or planning to make with

Note for milestone #3 & #4:

- This project will require you only to know or learn some basic Python. You may use the examples from the sample code provided in this project.
- Although the documents here are in Python, and I can assist you the best in Python, you are welcome to do so if you are interested in using other programming languages.
